SS 08 Financial Reporting and Analysis: Inventories, Long-lived Assets, Income Taxes, and Non-current Liabilities

Question #1 of 143

Question ID: 456301

All-Star Enterprises purchased a machine on January 1. The company uses straight-line depreciation for financial reporting and accelerated depreciation for tax purposes. Depreciation for tax purposes during the year was $36,000 greater than depreciation for financial reporting. Assuming a 30% tax rate will apply in the future, how much will be recorded as a deferred tax liability during the year?

A) $36,000

B) $25,200

C) $10,800

Question #2 of 143

Question ID: 434299

A temporary difference between income tax expense and taxes payable result in a(n):

A) deferred tax item.

B) adjustment to the effective tax rate.

C) gain or loss in comprehensive income.

Question #3 of 143

Question ID: 434313

Compared to issuing a bond at par value, and holding all else equal, when a company issues a bond at a premium, its effect on the debt/equity ratio will be:

A) no effect on the ratio over the life of the bond.

B) a decreasing trend in the ratio over the life of the bond.

C) an increasing trend in the ratio over the life of the bond.

Question #4 of 143

Question ID: 414625

An analyst compares two companies that are identical except that Company X uses finance leases and Company Y uses operating leases. The analyst would expect Company X's debt-to-equity ratio, relative to Company Y's, to be:

A) the same.

B) lower.

C) higher.

Question #5 of 143

Question ID: 414594

Which of the following statements regarding zero-coupon bonds is *most* accurate?

A) A company should initially record zero-coupon bonds at their discounted present value.

B) Interest expense is a combination of operating and financing cash flows.

C) The interest expense in each period is found by applying the discount rate to the book value of debt at the end of the period.

Question #6 of 143

Question ID: 414533

A tax loss carryforward is *best* described as the:

A) net taxable loss that can be used to reduce taxable income in the future.

B) net taxable loss that can be used to refund paid taxes from the previous year.

C) difference of deferred tax liabilities and deferred tax assets.

Question #7 of 143

Question ID: 414640

Which of the following statements regarding the effect of a finance lease on the lessee's statement of cash flows is *least* accurate?

A) The rental expense serves to reduce the cash flow for financing because it is an investment expense.

B) The change in the finance lease liability on the balance sheet is a cash flow from financing.

C) The interest expense portion of the lease payments reduces cash flow from operations.

Question #8 of 143

Question ID: 414604

A zero coupon bond, compared to a bond issued at par, will result in higher:

A) cash flows from financing (CFF).

B) cash flows from operations (CFO).

C) interest expense.

Question #9 of 143

Question ID: 434307

Habel Inc. owns equipment with a tax base of $400,000 and a carrying value of $600,000. Habel also has a tax loss carryforward of $200,000 that is expected to be utilized in the foreseeable future. Deferred tax items on the balance sheet are valued based on a tax rate of 30%. If the tax rate increases to 35%, the adjustments to the value of deferred tax items will *most likely* cause Habel's total liabilities-to-equity ratio to:

A) decrease.

B) increase.

C) remain unchanged.

Question #10 of 143

Question ID: 467388

A bond is issued at the end of the year 20X0 with an 8% semiannual coupon rate, 5 years to maturity, and a par value of $1,000. The bond's yield at issuance is 10%. Using the effective interest method, if the yield has decreased to 9% at the end of the year 20X1, the balance sheet liability for the bond is *closest to*:

A) 967.

B) 935.

C) 923.

Question #11 of 143

Question ID: 414643

Penguin Company is planning to lease a $5 million machine to produce goods for eventual sale. Penguin is able to structure the lease so as to classify it as either an operating or a finance lease. Advantages to Penguin of classifying this lease as an operating lease are *least likely* to include that:

A) depreciation is not recorded.

B) the lease is not reported as debt on Penguin's balance sheet, so leverage ratios are not increased.

C) no disclosures of payments due under the lease are required.

Question #12 of 143

Question ID: 414584

A firm purchased a piece of equipment for $6,000 with the following information provided:

- Revenue will be $15,000 per year.
- The equipment has a 3-year life expectancy and no salvage value.
- The firm's tax rate is 30%.
- Straight-line depreciation is used for financial reporting and double declining is used for tax purposes.

Calculate taxes payable for years 1 and 2.

	Year 1	Year 2
A)	3,300	4,100
B)	3,900	3,900
C)	600	-200

Question #13 of 143

Question ID: 414606

A firm issues a $5 million zero coupon bond with a maturity of four years when market rates are 8%. Assuming semiannual compounding periods, the total interest on this bond is:

A) $1,600,000.

B) $1,200,000.

C) $1,346,549.

Question #14 of 143

Question ID: 414593

When the market rate is greater than the coupon rate, the bond is called a:

A) discount bond.

B) par bond.

C) premium bond.

Question #15 of 143

Question ID: 414574

Deferred tax liabilities may result from:

A) pretax income greater than taxable income due to permanent differences.

B) pretax income less than taxable income due to temporary differences.

C) pretax income greater than taxable income due to temporary differences.

Question #16 of 143

Question ID: 414600

A bond is issued with the following data:

- $10 million face value.
- 9% coupon rate.
- 8% market rate.
- 3-year bond with semiannual payments.

Assuming market rates do not change, what will the bond's market value be one year from now and what is the total interest expense over the life of the bond?

	Value in 1-Year	Total Interest Expense
A)	11,099,495	2,437,893
B)	10,181,495	2,437,893
C)	10,181,495	2,962,107

Question #17 of 143

Question ID: 414637

For a given lease payment and term, which of the following is *least accurate* regarding the effects of the classification of the lease as a finance lease as compared to an operating lease?

A) The lessee's current ratio will be higher for a finance lease.

B) The lessee's asset turnover will be lower for a finance lease.

C) The lessee's debt-to-equity ratio will be higher for a finance lease.

Question #18 of 143

Question ID: 414534

If a firm uses accelerated depreciation for tax purposes and straight-line depreciation for financial reporting, which of the following results is *least likely*?

A) Income tax expense will be greater than taxes payable.

B) A temporary difference will result between tax and financial reporting.

C) A permanent difference will result between tax and financial reporting.

Question #19 of 143

Question ID: 596409

For analytical purposes, if a deferred tax liability is expected to not be reversed, it should be treated as a(n):

A) an addition to equity.

B) liability.

C) immaterial amount and ignored.

Question #20 of 143

Question ID: 414555

Laser Tech has net temporary differences between tax and book income resulting in a deferred tax liability of $30.6 million. According to U.S. GAAP, an increase in the tax rate would have what impact on deferred taxes and net income, respectively:

	Deferred Taxes	Net Income
A)	Increase	Decrease
B)	No effect	Decrease
C)	Increase	No effect

Question #21 of 143

Question ID: 414607

When bonds are issued at a premium:

A) earnings of the firm decrease over the life of the bond as the bond premium is amortized.

B) coupon interest paid decreases each period as bond premium is amortized.

C) earnings of the firm increase over the life of the bond as the bond premium is amortized.

Question #22 of 143

Question ID: 414548

A company purchased a new pizza oven directly from Italy for $12,676. It will work for 5 years and has no salvage value. The tax rate is 41%, and annual revenues are constant at $7,192. For financial reporting, the straight-line depreciation method is used, but for tax purposes depreciation is accelerated to 35% in years 1 and 2, and 30% in year 3. For purposes of this exercise ignore all expenses other than depreciation.

What is the net income and depreciation expense for year one for financial reporting purposes?

	Net Income	Depreciation Expense
A)	$2,748	$2,535

B)	$4,657	$2,748
C)	$2,535	$3,169

Question #23 of 143

Question ID: 479061

Firm 1 has a deferred tax liability and Firm 2 has a deferred tax asset. If the tax rate decreases, the balance sheet values of these deferred tax items will:

	Firm 1	Firm 2
A)	increase.	increase.
B)	decrease.	decrease.
C)	increase.	decrease.

Question #24 of 143

Question ID: 414547

Corcoran Corp acquired an asset on 1 January 2004, for $500,000. For financial reporting, Corcoran will depreciate the asset using the straight-line method over a 10-year period with no salvage value. For tax purposes the asset will be depreciated straight line for five years and Corcoran's effective tax rate is 30%. Corcoran's deferred tax liability for 2004 will:

A) decrease by $50,000.
B) decrease by $15,000.
C) increase by $15,000.

Question #25 of 143

Question ID: 596408

When analyzing a company's financial leverage, deferred tax liabilities are *best* classified as:

A) a liability or equity, depending on the company's particular situation.
B) neither as a liability, nor as equity.
C) a liability.

Question #26 of 143

Question ID: 414545

A firm buys an asset with an estimated useful life of five years for $100,000 at the beginning of the year. The firm will depreciate the asset on a straight-line basis with no salvage value on its financial statements and will use double declining balance depreciation for tax. The tax basis for this asset at the end of the first year is *closest* to:

A) $40,000.

B) $80,000.

C) $60,000.

Question #27 of 143

Question ID: 414576

Which of the following statements *best* justifies analyst scrutiny of valuation allowances?

A) Changes in valuation allowances can be used to manage reported net income.

B) Increases in valuation allowances may be a signal that management expects earnings to improve in the future.

C) If differences in taxable and pretax incomes are never expected to reverse, a company's equity may be understated.

Question #28 of 143

Question ID: 414581

While evaluating the financial statements of Omega, Inc., the analyst observes that the effective tax rate is 7% less than the statutory rate. The source of this difference is determined to be a tax holiday on a manufacturing plant located in South Africa. This item is *most* likely to be:

A) sporadic in nature, but the effect is typically neutralized by higher home country taxes on the repatriated profits.

B) sporadic in nature, and the analyst should try to identify the termination date and determine if taxes will be payable at that time.

C) continuous in nature, so the termination date is not relevant.

Question #29 of 143

Question ID: 414598

On December 31, 2004, Newberg, Inc. issued 5,000 $1,000 face value seven percent bonds to yield six percent. The bonds pay interest semi-annually and are due December 31, 2011. On its December 31, 2005, income statement, Newburg should report interest expense of:

A) $300,000.

B) $350,000.

C) $316,448.

Question #30 of 143

Question ID: 414550

Unit Technologies uses accrual basis for financial reporting purposes and cash accounting for tax purposes. So far this year, Unit Technologies has recorded $195,000 in revenue for financial reporting purposes, but, on a cash basis, revenue was only $131,000. Assume expenses at 50 percent in both cases (i.e., $ 97,500 on accrual basis and $ 65,500 on cash basis), and a tax rate of 34%. What is the deferred tax liability or asset? A deferred tax:

A) asset of $10,880.
B) liability of $10,880.
C) liability of $16,320.

Question #31 of 143

Question ID: 414608

Which of the following statements for a bond issued with a coupon rate above the market rate of interest is *least* accurate?

A) The value of the bond will be amortized toward zero over the life of the bond.
B) The bond will be shown on the balance sheet at the premium value.
C) The associated interest expense will be lower than that implied by the coupon rate.

Question #32 of 143

Question ID: 414623

Compared to a finance lease, an operating lease is *most likely* to be favored when:

A) management compensation is not based on returns on invested capital.
B) the lessee has bond covenants relating to financial policies.
C) at the end of the lease, the lessee may be better able to sell the asset than the lessor.

Question #33 of 143

Question ID: 485781

A health care company purchased a new MRI machine on 1/1/X3. At year-end the company recorded straight-line depreciation expense of $75,000 for book purposes and accelerated depreciation expense of $94,000 for tax purposes. Management estimates warranty expense related to corrective eye surgeries performed in 20X3 to be $250,000. Actual warranty expenses of $100,000 were incurred in 20X3 related to surgeries performed in 20X2. The company's tax rate for the current year was 35%, but a tax rate of 37% has been enacted into law and will apply in future periods. Assuming these are the only relevant entries for deferred taxes, the company's recorded changes in deferred tax assets and liabilities on 12/31/X3 are *closest to*:

<u>DTA</u> <u>DTL</u>

A)	$55,500	$7,030
B)	$55,500	$6,650
C)	$52,500	$6,650

Question #34 of 143

Question ID: 434312

A company issues an annual-pay bond with the following characteristics:

Face value	$67,831
Maturity	4 years
Coupon	7%
Market interest rates	8%

What is the unamortized discount at the end of the first year?

A) $1,750.

B) $1,209.

C) $538.

Question #35 of 143

Question ID: 414651

Other things equal, and ignoring issuance costs, a firm that raises cash by issuing a new bond is *most likely* to:

A) increase its leverage ratios and increase its coverage ratios.

B) increase its leverage ratios and decrease its coverage ratios.

C) decrease its leverage ratios and increase its coverage ratios.

Question #36 of 143

Question ID: 414556

Year ending 31 December:	*2002*	*2003*	*2004*
Income Statement:			
Revenues after all expenses other than depreciation	$200	$300	$400
Depreciation expense	<u>50</u>	<u>50</u>	<u>50</u>
Income before income taxes	$150	$250	$350
Tax return:			
Taxable income before depreciation expense	$200	$300	$400
Depreciation expense	<u>75</u>	<u>50</u>	<u>25</u>

Taxable income	$125	$250	$375

Assume an income tax rate of 40% and zero deferred tax liability on 31 December 2001.

The deferred tax liability to be shown in the 31 December 2003, balance sheet and the 31 December 2004 balance sheet, is:

	2003	2004
A)	$0	$10
B)	$10	$0
C)	$25	$20

Question #37 of 143

Question ID: 498761

For a company which owns a majority of the equity of a subsidiary, whether to create a deferred tax liability for undistributed profits from the subsidiary depends on an "indefinite reversal criterion" under:

A) IFRS, but not U.S. GAAP.

B) both IFRS and U.S. GAAP.

C) U.S. GAAP, but not IFRS.

Question #38 of 143

Question ID: 414562

Selected information from Kentucky Corp.'s financial statements for the year ended December 31 was as follows (in $ millions):

Property, Plant & Equip.	10	Deferred Tax Liability	0.6
Accumulated Depreciation	(4)		

The balances were all associated with a single asset. The asset was permanently impaired and has a present value of future cash flows of $4 million. After Kentucky writes down the asset, Kentucky's tax accounts will be affected as follows (the tax rate is 40%):

A) deferred tax liability will be eliminated and deferred tax assets will increase $1.4 million.

B) taxes payable will decrease $800,000.

C) deferred tax liability will be eliminated and deferred tax assets will increase $200,000.

Question #39 of 143

Question ID: 414647

The present value of benefits earned during the current period by participants in a defined benefit pension plan is *best* described as the plan's:

A) service cost.

B) past service cost.

C) net pension liability.

Question #40 of 143

Question ID: 414641

The Mader Corporation leases an asset for five years with lease payments of $10,000 per year. If Mader classifies the lease as a finance lease, which financial statements are affected at the end of the first year?

A) Income statement only.

B) Income statement and balance sheet only.

C) Statement of cash flows, income statement, and balance sheet.

Question #41 of 143

Question ID: 434306

A company purchased a new pizza oven for $12,676. It will work for 5 years and has no salvage value. The tax rate is 41%, and annual revenues are constant at $7,192. For financial reporting, the straight-line depreciation method is used, but for tax purposes depreciation is 35% of original cost in years 1 and 2 and the remaining 30% in Year 3. For this question ignore all expenses other than depreciation.

What is the deferred tax liability as of the end of year three?

A) $1,029.

B) $780.

C) $2,079.

Question #42 of 143

Question ID: 414536

If timing differences that give rise to a deferred tax liability are not expected to reverse then the deferred tax:

A) must be reduced by a valuation allowance.

B) should be considered an increase in equity.

C) should be considered an asset or liability.

Question #43 of 143

Question ID: 414636

If a lease is treated as a finance lease, as compared to being treated as an operating lease, the effect on the lessee's current ratio and the debt/equity ratio will be an:

	Current Ratio	Debt/Equity Ratio
A)	Increase	Decrease
B)	Increase	Increase
C)	Decrease	Increase

Question #44 of 143

Question ID: 414646

Which of the following is *least likely* disclosed in the financial statement footnotes of a lessee?

A) A general description of the leasing arrangement.

B) The lease interest rate.

C) The lease payments to be paid in each of the next five years.

Question #45 of 143

Question ID: 414558

The Puchalski Company reported the following:

	Year 1	*Year 2*	*Year 3*	*Year 4*
Income before taxes	$1,000	$1,000	$900	$800
Taxable income	$800	$900	$900	$1,000

Puchalski has no deferred tax asset or liability prior to Year 1. If the tax rate is 40%, what is the amount of the deferred tax asset or liability reported at the end of Year 3?

A) Liability of $120.

B) Asset of $120.

C) Asset of $80.

Question #46 of 143

Question ID: 414615

Larry Purcell, an entry-level fixed income analyst at Knowlton & Smeades LLC, was discussing debt covenants with his supervisor, Andy Holzman. During the meeting Purcell made the following statements regarding bond covenants:

Statement 1: If a firm violates any of its debt covenants, the company will immediately go into bankruptcy and the creditors of the firm will take over the liquidation of its assets.

Statement 2: Debt covenants are important in evaluating a firm's credit risk and to better understand how the restrictions of the covenants can affect the firm's growth prospects and choice of accounting policies.

With respect to these statements:

A) both are correct.

B) only one is correct.

C) both are incorrect.

Question #47 of 143

Question ID: 498763

A debt covenant is *most likely* to restrict a firm from:

A) decreasing its common dividends.

B) issuing new common shares.

C) repurchasing common shares.

Question #48 of 143

Question ID: 414566

Given the following data regarding two firms under different scenarios, determine the amount of any deferred tax liability or asset.

Firm 1:

Tax Reporting		*Financial Reporting*	
Revenue	$500,000	Revenue	$500,000
Depreciation	$100,000	Depreciation	$50,000
Taxable income	$400,000	Pretax income	$450,000
Taxes payable	$160,000	Tax expense	$180,000

Net income	$240,000	Net income	$270,000

Firm 2:

Tax Reporting		*Financial Reporting*	
Revenue	$500,000	Revenue	$500,000
Warranty expense	$0	Warranty expense	$10,000
Taxable income	$500,000	Pretax income	$490,000
Taxes payable	$200,000	Tax expense	$196,000
Net income	$300,000	Net income	$294,000

	Firm 1 Deferred Tax:	Firm 2 Deferred Tax:
A)	$20,000 Asset	$6,000 Liability
B)	$30,000 Asset	$6,000 Asset
C)	$20,000 Liability	$4,000 Asset

Question #49 of 143

Question ID: 414628

Which of the following statements about the impact of leases on the financial statements of the lessee is *least* accurate?

A) Net income is lower in the early years of a finance lease than an operating lease.
B) Cash flow from investing is higher for a finance lease than an operating lease.
C) A finance lease results in higher liabilities compared to an operating lease.

Question #50 of 143

Question ID: 485783

A company issues 5% semiannual coupon, 3-year, $1,000 par value bonds on January 1, 20X0, when the market interest rate is 13.3%. The sale proceeds are $800. Under the effective interest rate method, what amount of interest expense per $1,000 par value will the company record for the year ending December 31, 20X1?

A) $116.29.
B) $106.40.
C) $66.29.

Question #51 of 143

Question ID: 414644

Which of the following statements regarding finance and operating leases is *least* accurate?

A) During the life of an operating lease, the rent expense equals the lease payment.

B) For financial reporting of finance and operating leases, no entry is required on the lessee's balance sheet at the inception of the lease.

C) Asset turnover is higher for the lessee with an operating lease than a finance lease.

Question #52 of 143

Question ID: 414610

On December 31, 20X3 Okay Company issued 10,000 $1000 face value 10-year, 9% bonds to yield 7%. The bonds pay interest semi-annually. On its financial statements (prepared under U.S. GAAP) for the year ended December 31, 20X4, the effect of this bond on Okay's cash flow from operations is:

A) -$700,000.

B) -$755,735.

C) -$900,000.

Question #53 of 143

Question ID: 414575

Which of the following situations will *most likely* require a company to record a valuation allowance on its balance sheet?

A) A firm has differences between taxable and pretax income that are never expected to reverse.

B) To report depreciation, a firm uses the double-declining balance method for tax purposes and the straight-line method for financial reporting purposes.

C) A firm is unlikely to have future taxable income that would enable it to take advantage of deferred tax assets.

Question #54 of 143

Question ID: 434304

A company purchased a new pizza oven for $12,676. It will work for 5 years and has no salvage value. The tax rate is 41%, and annual revenues are constant at $7,192. For financial reporting, the straight-line depreciation method is used, but for tax purposes depreciation is 35% of original cost in years 1 and 2 and the remaining 30% in Year 3. For this question ignore all expenses other than depreciation.

What is the tax payable for year one?

A) $1,909.

B) $1,130.

C) $779.

Question #55 of 143

Question ID: 414583

Year:	*2002*	*2003*	*2004*
Income Statement:			
Revenues after all expenses other than depreciation	$200	$300	$400
Depreciation expense	50	50	50
Income before income taxes	$150	$250	$350
Tax return:			
Taxable income before depreciation expense	$200	$300	$400
Depreciation expense	75	50	25
Taxable income	$125	$250	$375

Assume an income tax rate of 40%.

The company's income tax expense for 2002 is:

A) $60.

B) $0.

C) $50.

Question #56 of 143

Question ID: 414616

Which of the following provisions would *least likely* be included in the bond covenants? The borrower must:

A) maintain insurance on the collateral that secures the bond.

B) maintain a debt-to-equity ratio of no less than 2:1.

C) not increase dividends to common shareholders while the bonds are outstanding.

Question #57 of 143

Question ID: 414535

Which of the following *best* describes valuation allowance? Valuation allowance is a reserve:

A) created when deferred tax assets are greater than deferred tax liabilities.

B) against deferred tax liabilities based on the likelihood that those liabilities will be paid.

C) against deferred tax assets based on the likelihood that those assets will not be realized.

Question #58 of 143

Question ID: 434300

An analyst has gathered the following tax information:

	Year 1	*Year 2*
Pretax Income	$60,000	$60,000
Taxable Income	$50,000	$65,000

The current tax rate is 40%. Assume the tax rate is reduced to 30% and the change is enacted at the beginning of Year 2.

In year 1, what are the taxes payable and what is the deferred tax liability (DTL)?

	Taxes payable	DTL
A)	$20,000	$3,000
B)	$24,000	$1,500
C)	$20,000	$1,500

Question #59 of 143

Question ID: 460647

A firm needs to adjust its financial statements for a change in the tax rate. Taxable income is $80,000 and pretax income is $120,000. The current tax rate is 50%, and the new tax rate is 40%. The effect on taxes payable of adjusting the tax rate is *closest to*:

A) $4,000.

B) $8,000.

C) $16,000.

Question #60 of 143

Question ID: 414645

Classifying a lease as an operating lease for a lessee, as opposed to a finance lease, will result in:

	Current Ratio	Debt/Equity Ratio	Asset Turnover Ratio
A)	Lower	Lower	Higher

B)	Higher	Lower	Higher
C)	Higher	Lower	Lower

Question #61 of 143

Question ID: 414553

A firm purchased a piece of equipment for $6,000 with the following information provided:

- Revenue will increase by $15,000 per year.
- The equipment has a 3-year life expectancy and no salvage value.
- The firm's tax rate is 30%.
- Straight-line depreciation is used for financial reporting and double declining balance is used for tax purposes.

Calculate the incremental income tax expense for financial reporting for years 1 and 2.

	Year 1	Year 2
A)	$600	-$200
B)	$3,300	$4,100
C)	$3,900	$3,900

Question #62 of 143

Question ID: 414617

In analyzing disclosures related to the financing liabilities of a company, which of the following disclosures would be *least* helpful to the analyst?

A) The present value of the future bond payments discounted at the coupon rate of the bonds.

B) The interest expense for the period as provided on the income statement or in a footnote.

C) Filings with the Securities and Exchange Commission (SEC) that disclose all outstanding securities and their features.

Question #63 of 143

Question ID: 414631

In a direct-financing lease, the implicit rate is such that the present value of the minimum lease payments:

A) is lower than the cost of the leased asset.

B) equals the cost of the leased asset.

C) equals the sale price of the leased asset.

Question #64 of 143

Question ID: 434311

An firm is issuing a bond with the following characteristics:

- Face value = $10.0 million
- Annual coupon = 5.6%
- Market yield at issuance = 6.5%
- 5 year maturity

Ignoring flotation costs, at issuance the bond will increase:

A) liabilities by $10.0 million.

B) assets by $9.626 million.

C) cash flow from investing by $9.626 million.

Question #65 of 143

Question ID: 414597

Interest expense is reported on the income statement as a function of:

A) the unamortized bond discount.

B) the market rate.

C) the coupon payment.

Question #66 of 143

Question ID: 414648

An employer offers a defined benefit pension plan and a defined contribution pension plan. The employer's balance sheet is *most likely* to present an asset or liability related to:

A) both of these pension plans.

B) the defined benefit plan.

C) the defined contribution plan.

Question #67 of 143

Question ID: 456302

Samson Therapeutics records all leases as operating leases. Compared to recording capital leases, this results in lower:

A) inventory.

B) leverage.

C) expenses.

Question #68 of 143

Question ID: 414630

According to U.S. GAAP, which of the following would *least likely* require a lessee to capitalize a lease?

A) The lease term is 75% or more of the estimated life of the leased asset.

B) The present value of the minimum lease payments is 90% or more of the fair value of the leased asset.

C) The lessee has an option to purchase the asset for its fair market value at the end of the lease.

Question #69 of 143

Question ID: 414559

Graphics, Inc. has a deferred tax asset of $4,000,000 on its books. As of December 31, it became more likely than not that $2,000,000 of the asset's value may never be realized because of the uncertainty of future income. Graphics, Inc. should:

A) reverse the asset account permanently by $2,000,000.

B) not make any adjustments until it is certain that the tax benefits will not be realized.

C) reduce the asset by establishing a valuation allowance of $2,000,000 against the asset.

Question #70 of 143

Question ID: 414629

Which of the following is *least likely* one of the criteria under U.S. GAAP for classifying a lease as a finance lease? The:

A) lease contains a bargain purchase option.

B) term of the lease is 75% or more of the estimated economic life of the leased property.

C) lessor retains ownership of the property at the end of the lease term.

Question #71 of 143

Question ID: 414605

Which of the following statements is *least* accurate? When a bond is issued at a discount:

A) the interest expense will increase over time.

B) cash flows from financing will be increased by the par value of the bond issue.

C) the interest expense will be equal to the coupon payment plus the amortization of the discount.

Question #72 of 143

Question ID: 414589

Proceeds from issuing a bond are recorded on the statement of cash flows as an inflow from:

A) investing (CFI).

B) financing (CFF).

C) operations (CFO).

Question #73 of 143

Question ID: 414588

Assuming all else equal, if the coupon rate offered on a bond is less than the corresponding market rate of interest, the bond will be issued at:

A) par.

B) a discount.

C) a premium.

Question #74 of 143

Question ID: 434310

A company issues an annual-pay bond with a face value of $135,662, maturity of 4 years, and 7% coupon, while market interest rates for its bonds are 8%. What is the unamortized discount at the end of the first year?

A) $1,209.

B) $538.

C) $3,495.

Question #75 of 143

Question ID: 414586

A tax rate that has been substantively enacted is used to determine the balance sheet values of deferred tax assets and deferred tax liabilities under:

A) IFRS only.

B) U.S. GAAP only.

C) both IFRS and U.S. GAAP.

Question #76 of 143

Question ID: 434308

Christophe Inc. is an electronics manufacturing firm. It owns equipment with a tax basis of $800,000 and a carrying value of $600,000 as the result an impairment charge. It also has a tax loss carryforward of $300,000 that is expected to be utilized within the next year or two. The tax rate on these items is 40% but the tax rate will decrease to 35%. Which of the following is *closest to* the effect on the income statement of the change in tax rate?

A) Decrease income tax expense by $5,000.

B) Increase income tax expense by $25,000.

C) Increase income tax expense by $5,000.

Question #77 of 143

Question ID: 414627

Which of the following statements that classify a lease as a finance lease under U.S. GAAP is *least* accurate?

A) The present value of the lease payments is at least 80% of the fair market value of the asset.

B) Title is transferred at the end of the lease period.

C) A bargain purchase option exists.

Question #78 of 143

Question ID: 485782

A firm has deferred tax assets of $315,000 and deferred tax liabilities of $190,000. If the tax rate increases, adjusting the value of the firm's deferred tax items will:

A) decrease income tax expense.

B) increase income tax expense.

C) have no effect on income tax expense.

Question #79 of 143

Question ID: 414602

Nomad Company issued $1,000,000 face value 2-year zero coupon bonds on December 31, 20X2 to yield 8% interest. Bond proceeds were $857,339. In 20X3 Nomad recorded interest expense of $68,587. In 20X4 Nomad recorded interest expense of $74,074 and paid out $1,000,000 to redeem the bonds. Based on these transactions only, Nomad's Statement of Cash Flows would show cash flow from operations (CFO) of:

A) zero in all years.

B) -$142,661 in 20X4.

C) -$68,587 in 20X3 and -$74,074 in 20X4.

Question #80 of 143

Question ID: 414639

If a lessee enters into a finance lease rather than an operating lease, it can expect to have a:

A) higher debt-to-equity ratio.

B) lower debt-to-equity ratio.

C) higher return on assets.

Question #81 of 143

Question ID: 652916

Permanent differences between taxable and pretax income:

A) are considered as changes in the effective tax rate.

B) can be deferred in some cases.

C) are not addressed specifically in the financial statements.

Question #82 of 143

Question ID: 414587

Under IFRS, deferred tax assets and deferred tax liabilities are classified on the balance sheet as:

A) noncurrent items.

B) current items.

C) either current or noncurrent items.

Question #83 of 143

Question ID: 414531

Which of the following statements about tax deferrals is NOT correct?

A) A deferred tax liability is expected to result in future cash outflow.

B) Taxes payable are determined by pretax income and the tax rate.

C) Income tax paid can include payments or refunds for other years.

Question #84 of 143

Question ID: 598674

Assume a city issues a $5 million semiannual-pay bond to build a new arena. The bond has a coupon rate of 8% and will mature in 10 years. When the bond is issued its yield to maturity is 9%. Interest expense in the second semiannual period is *closest to:*

A) $80,000.

B) $210,830.

C) $106,550.

Question #85 of 143

Question ID: 414560

An analyst gathered the following information about a company:

- Taxable income = $100,000.
- Pretax income = $120,000.
- Current tax rate = 20%.
- Tax rate when the reversal occurs will be 10%.

What is the company's tax expense?

A) $22,000.

B) $24,000.

C) $10,000.

Question #86 of 143

Question ID: 434303

An analyst gathers the following data for Alice Company:

- Alice Company reported a pretax income of $400,000 in its income statement for the period ended December 31, 20X2.
- Included in its pretax income are: (1) interest received on tax-free municipal bonds $50,000 and (2) rent expense of $20,000. Only $10,000 was paid in cash for rent during 20X2.
- Alice follows cash basis for tax reporting.
- Alice's tax rate is 40%.

Based on the information provided, which of the following is *most* accurate with respect to deferred tax during 20X2? Alice's deferred tax:

A) asset will increase by $4,000.

B) will remain unchanged.

C) liability will increase by $4,000.

Question #87 of 143

Question ID: 414650

A firm is more solvent if it has:

A) high leverage and coverage ratios.

B) low leverage and coverage ratios.

C) low leverage ratios and high coverage ratios.

Question #88 of 143

Question ID: 414632

For a finance lease, the amount recorded initially by the lessee as a liability will *most likely*:

A) equal the present value of the minimum lease payments at the beginning of the lease.

B) equal the total of the minimum lease payments.

C) be less than the fair value of the leased asset.

Question #89 of 143

Question ID: 498764

A company has issued new 3-year bonds at par in each of the last five years. On the company's balance sheet, principal due on its bonds will appear as:

A) long-term liabilities only.

B) both current and long-term liabilities.

C) current liabilities only.

Question #90 of 143

Question ID: 485784

Crawford Corp. and Vernon Corp. are lessors who have leased assets on identical terms to firms with similar credit ratings. Crawford reports its lease as a sales-type lease and Vernon reports its lease as a direct financing lease. It is *most likely* that:

A) Crawford retains the leased asset on its balance sheet.

B) both firms report under U.S. GAAP.

C) Vernon reports under IFRS.

Question #91 of 143

Question ID: 414611

At the beginning of 20X3, Creston Company issues $10 million face amount of 6% coupon bonds when the market rate of interest is 7%. The bonds mature in four years and pay interest annually. Assuming the effective interest rate method, what is the bond liability Creston will report at the end of 20X3?

A) $9,661,279

B) $9,737,568

C) $10,346,511

Question #92 of 143

Question ID: 414612

A firm can recognize a gain or loss on derecognition of a bond the firm has issued:

A) either before maturity or at maturity.

B) before maturity, but not at maturity.

C) at maturity, but not before maturity.

Question #93 of 143

Question ID: 414546

Nespa, Inc., has a deferred tax liability on its balance sheet in the amount of $25 million. A change in tax laws has increased future tax rates for Nespa. The impact of this increase in tax rate will be:

A) a decrease in deferred tax liability and an increase in tax expense.

B) an increase in deferred tax liability and an increase in tax expense.

C) a decrease in deferred tax liability and a decrease in tax expense.

Question #94 of 143

Question ID: 414565

A company purchases a new pizza oven for $12,675. It will work for 5 years and have no salvage value. The company will depreciate the oven over 5 years using the straight-line method for financial reporting, and over 3 years for tax reporting. If the tax rate for years 4 and 5 changes from 41% to 31%, the deferred tax liability as of the end of year 3 is *closest to:*

A) $1,570

B) $1,040

C) $2,080

Question #95 of 143

Question ID: 414544

Alter Inc. determines that it has $35,000 of accounts receivable outstanding at the end of 20X8. Based on past experience, it recognizes an allowance for bad debt equal to 10% of its credit sales. The tax base of Alter's accounts receivable at the end of 20X8 is *closest* to:

A) $35,000.

B) $3,500.

C) $31,500.

Question #96 of 143

Question ID: 414649

The difference between the fair value of a defined benefit pension plan's assets and its estimated benefit obligation is recognized:

A) as an actuarial adjustment in other comprehensive income.

B) on the income statement as pension expense.

C) on the balance sheet as a net pension asset or liability.

Question #97 of 143

Question ID: 414618

Which of the following is *least likely* to be disclosed in the financial statements of a bond issuer?

A) The amount of debt that matures in each of the next five years.

B) The market rate of interest on the balance sheet date.

C) Collateral pledged as security in the event of default.

Question #98 of 143

Question ID: 627887

For a firm financed with common stock and long-term fixed-rate debt, an analyst should *most appropriately* adjust which of the following items for a change in market interest rates?

A) Debt-to-equity ratio.

B) Interest paid.

C) Cash flow from financing.

Question #99 of 143

Question ID: 500860

The primary purpose of bond covenants is to:

A) clearly define the responsibilities of the borrower and the lender.

B) protect bondholders from the actions of equity owners.

C) define bond characteristics.

Question #100 of 143

Question ID: 414620

Compared to a finance lease, an operating lease results in which of the following on the lessee's balance sheet?

A) Higher liabilities.

B) Lower liabilities.

C) Higher assets.

Question #101 of 143

Question ID: 598978

Which of the following factors is *least likely* to cause a difference between a firm's effective tax rate and statutory rate?

A) Tax credits.

B) Deductible expenses.

C) Non-deductible expenses.

Question #102 of 143

Question ID: 414642

Which of the following statements regarding a direct financing lease is *least* accurate?

A) The principal portion of the lease payment is a cash inflow from investing on the lessor's cash flow statement.

B) The lessor recognizes no gross profit at the inception of the lease.

C) Interest revenue on the lessor's income statement equals the implicit interest rate times the lease payment.

Question #103 of 143

Question ID: 414537

Which of the following statements regarding deferred taxes is NOT correct?

A) If deferred taxes are not expected to reverse in the future then they should be classified as equity.

B) If deferred tax liabilities are not included in equity, debt-to-equity ratio will be reduced.

C) Only those components of deferred tax liabilities that are likely to reverse should be considered a liability.

Question #104 of 143

Question ID: 598979

Deferred tax items should be measured based on the:

A) statutory tax rate at the time when the temporary difference is recognized.

B) firm's effective tax rate at the time when the temporary difference reverses.

C) tax rate that will apply when the temporary difference reverses.

Question #105 of 143

Question ID: 414564

If a firm overestimates its warranty expenses, which of the following results is *least likely*?

A) Income tax expense will be greater than taxes payable.

B) A deferred tax asset will result.

C) A timing difference will result between tax and financial reporting.

Question #106 of 143

Question ID: 414614

Ivo Company has a $10 million face value bond issue outstanding. These bonds include a call option that permits Ivo to redeem the bonds at any time for 101% of par. These bonds were issued at a premium and have a carrying value of $10,200,000. If Ivo calls the bonds, its income statement will reflect:

A) a loss on redemption.

B) neither a gain nor a loss on redemption.

C) a gain on redemption.

Question #107 of 143

Question ID: 414551

This year, Blue Horizon has recorded $390,000 in revenue for financial reporting purposes, but, on a cash basis, revenue was only $262,000. Assume expenses at 50% in both cases (i.e., $195,000 on accrual basis and $131,000 on cash basis), and a tax rate of 34%. What is the deferred tax liability or asset? A deferred tax:

A) asset of $21,760.

B) liability of $21,760.

C) liability of $16,320.

Question #108 of 143

Question ID: 414595

A $1,000 bond is issued with an 8% semiannual coupon rate and 5 years to maturity when market interest rates are 10%. What is the initial liability?

A) 1023.

B) 855.

C) 923.

Question #109 of 143

Question ID: 414577

Which of the following statements *best* describes the impact of a valuation allowance on the financial statements? A valuation allowance:

A) reduces reported income, increases liabilities, and reduces equity.

B) increases reported income, reduces assets, and reduces equity.

C) reduces reported income, reduces assets, and reduces equity.

Question #110 of 143

Question ID: 414554

A firm purchased a piece of equipment for $6,000 with the following information provided:

- Revenue will increase by $15,000 per year.
- The equipment has a 3-year life expectancy and no salvage value.
- The firm's tax rate is 30%.
- Straight-line depreciation is used for financial reporting and double declining is used for tax purposes.

What will the firm report for deferred taxes on the balance sheet for years 1 and 2?

	Year 1	Year 2
A)	$600	$400
B)	$3,300	$4,100
C)	$3,900	$3,900

Question #111 of 143

Question ID: 414549

Kruger Associates uses an accrual basis for financial reporting purposes and cash basis for tax purposes. Cash collections from customers are $476,000, and accrued revenue is only $376,000. Assume expenses at 50% in both cases (i.e., $238,000 on cash basis and $188,000 on accrual basis), and a tax rate of 34%. What is the deferred tax asset or liability? A deferred tax:

A) asset of $48,960.

B) liability of $17,000.

C) asset of $17,000.

Question #112 of 143

Question ID: 434305

A company purchased a new pizza oven for $12,676. It will work for 5 years and has no salvage value. The tax rate is 41%, and annual revenues are constant at $7,192. For financial reporting, the straight-line depreciation method is used, but for tax purposes depreciation is 35% of original cost in years 1 and 2 and the remaining 30% in Year 3. For this question ignore all expenses other than depreciation.

What is the deferred tax liability as of the end of year one?

A) $780.

B) $1,129.

C) $1,909.

Question #113 of 143

Question ID: 414561

For the year ended 31 December 2004, Pick Co's pretax financial statement income was $400,000 and its taxable income was $300,000. The difference is due to the following:

Interest on tax-exempt municipal bonds	$140,000
Premium expense on key person life insurance	$(40,000)
Total	$100,000

Pick's statutory income tax rate is 30 percent. In its 2004 income statement, what amount should Pick report as current provision for tax payable?

A) $102,000.

B) $120,000.

C) $90,000.

Question #114 of 143

Question ID: 414613

A company redeems $10,000,000 of bonds that it issued at par value for 101% of par or $10,100,000. In its statement of cash flows, the company will report this transaction as a:

A) $10,000,000 CFF outflow and $100,000 CFO outflow.

B) 10,100,000 CFF outflow.

C) $10,100,000 CFO outflow.

Question #115 of 143

Question ID: 414633

Compared to an operating lease, a lessee using a finance lease is *least likely* to have:

A) higher cash flow from financing during the lease period.

B) lower net income in the earlier years of the lease.

C) a lower current ratio.

Question #116 of 143

Question ID: 414582

An analyst gathered the following information about a company:

- Pretax income = $10,000.
- Taxes payable = $2,500.
- Deferred taxes = $500.
- Tax expense = $3,000.

What is the firm's reported effective tax rate?

A) 5%.

B) 25%.

C) 30%.

Question #117 of 143

Question ID: 414596

A company issued a bond with a face value of $67,831, maturity of 4 years, and 7% annual-pay coupon, while the market interest rates are 8%.

What is the unamortized discount when the bonds are issued?

A) $1,748.07.

B) $2,246.65.

C) $498.58.

Question #118 of 143

Question ID: 414624

A lessee *most likely* has an incentive to structure a lease as an operating lease rather than a finance lease when it:

A) has a high debt-to-equity ratio.

B) is very profitable.

C) does not have debt covenants.

Question #119 of 143

Question ID: 414570

Enduring Corp. operates in a country where net income from sales of goods are taxed at 40%, net gains from sales of investments are taxed at 20%, and net gains from sales of used equipment are exempt from tax. Installment sale revenues are taxed upon receipt.

For the year ended December 31, 2004, Enduring recorded the following before taxes were considered:

- Net income from the sale of goods was $2,000,000, half was received in 2004 and half will be received in 2005.
- Net gains from the sale of investments were $4,000,000, of which 25% was received in 2004 and the balance will be received in the 3 following years.
- Net gains from the sale of equipment were $1,000,000, of which 50% was received in 2004 and 50% in 2005.

On its financial statements for the year ended December 31, 2004, Enduring should apply an effective tax rate of:

A) 22.86% and increase its deferred tax asset by $1,000,000.

B) 22.86% and increase its deferred tax liability by $1,000,000.

C) 26.67% and increase its deferred tax liability by $1,000,000.

Question #120 of 143

Question ID: 713913

A dance club purchases new sound equipment for $25,352. It will work for 5 years and has no salvage value. For financial reporting, the straight-line depreciation method is used, but for tax purposes depreciation is 35% of original cost in years 1 and 2 and the remaining 30% in Year 3. Annual revenues are constant at $14,384 over these five years. If the tax rate for years 4 and 5 changes from 41% to 31%, what is the deferred tax liability as of the end of year 3?

A) $2,948.

B) $1,039.

C) $3,144.

Question #121 of 143

Question ID: 414543

In 20X8, Oliver Ltd. received $80,000 cash from a customer for goods that it could not deliver until the next year and established a liability for unearned revenue. Oliver reports under U.S. GAAP, faces a 40% tax rate, and is located in a tax jurisdiction where unearned revenue is taxed as received. On their balance sheet for 20X8, what change in deferred tax should Oliver record as a result of this transaction?

A) A deferred tax asset of $32,000.

B) There is no effect on deferred tax items from this transaction.

C) A deferred tax liability of $32,000.

Question #122 of 143

Question ID: 414591

At the date of issuance the market interest rate was above the coupon rate. Bonds of this nature would sell for:

A) premium.

B) par.

C) discount.

Question #123 of 143

Question ID: 414621

A firm is *most likely* to lease an asset rather than purchasing it if the asset:

A) may be made obsolete by rapid technological advances.

B) is costly to move from place to place.

C) has a high salvage value relative to its cost.

Question #124 of 143

Question ID: 414541

For purposes of financial analysis, an analyst should:

A) determine the treatment of deferred tax liabilities on a case-by-case basis.

B) always consider deferred tax liabilities as stockholder's equity.

C) always consider deferred tax liabilities as a liability.

Question #125 of 143

Question ID: 414619

As compared to purchasing an asset, which of the following is least likely an incentive to structure a transaction as a finance lease?

A) The terms of the lease can be negotiated to better meet each party's needs.

B) Risk of obsolescence is reduced because the asset is returned to the lessor.

C) The lease enhances the balance sheet by the lease liability.

Question #126 of 143

Question ID: 702537

Which of the following financial ratios is *least likely* to be affected by classification of deferred taxes as a liability or equity?

A) Return on equity (ROE).

B) Return on assets (ROA).

C) Leverage ratio.

Question #127 of 143

Question ID: 414552

Camphor Associates uses accrual basis for financial reporting purposes and cash basis for tax purposes. Cash collections from customers is $238,000, and accrued revenue is only $188,000. Assume expenses at 50% in both cases (i.e., $119,000 on cash basis and $94,000 on accrual basis), and a tax rate of 34%. What is the deferred tax asset/liability in this case? A deferred tax:

A) asset of $8,500.

B) asset of $48,960.

C) liability of $8,500.

Question #128 of 143

Question ID: 414530

A) investing cash flow.

B) operating cash flow.

C) financing cash flow.

Question #134 of 143

Question ID: 414603

For a given par value, which of the following debt issues will have the highest cash flows from financing?

A) Zero-coupon bond.

B) Bonds issued at premium.

C) Bonds issued at discount.

Question #135 of 143

Question ID: 414622

The lessee has an incentive to classify a lease as an operating lease, rather than as a finance lease, because an operating lease:

A) does not appear on the balance sheet.

B) has payments that are less than a capital lease's payments.

C) has no risk involved because the lessor assumes all risk.

Question #136 of 143

Question ID: 434302

An analyst gathers the following data for Alice Company:

- Alice Company reported a pretax income of $400,000 in its income statement for the period ended December 31, 20X2.
- Included in its pretax income are: (1) interest received on tax-free municipal bonds $50,000 and (2) rent expense of $20,000. Only $10,000 was paid in cash for rent during 20X2.
- Alice follows cash basis for tax reporting.
- Alice's tax rate is 40%.

What is the income tax expense that Alice should report on its income statement for the year ended December 31, 20X2?

A) $160,000.

B) $132,000.

C) $140,000.

Question #137 of 143

Question ID: 414585

Under U.S. GAAP, which of the following statements regarding the disclosure of deferred taxes in a company's balance sheet is *most* accurate?

A) Current deferred tax liability and noncurrent deferred tax asset are netted, resulting in the disclosure of a net noncurrent deferred tax liability or asset.

B) There should be a combined disclosure of all deferred tax assets and liablities.

C) Current deferred tax liability, current deferred tax asset, noncurrent deferred tax liability and noncurrent deferred tax asset are each disclosed separately.

Question #138 of 143

Question ID: 654848

The Puchalski Company reported the following:

	Year 1	*Year 2*	*Year 3*	*Year 4*
Income before taxes	$1,000	$1,000	$900	$800
Taxable income	$800	$900	$900	$1,000

The differences between income before taxes and taxable income are the result of using accelerated depreciation for tax purposes on an asset purchased in Year 1. Puchalski had no deferred tax liability prior to Year 1. If the tax rate is 40%, what is the amount of the deferred tax liability reported at the end of Year 4?

A) $120.

B) $80.

C) $40.

Question #139 of 143

Question ID: 414590
